

Managing Licenses

[Click here for 1.0 Documentation](#)

A license key is required to access all SQL Elements features. This license determines the number of SQL server instances that you can monitor.

View your license status, add, or buy a new license key using the Manage License action. To access this option, go to the **Administration** tab, and click **Manage License** on the **Licensing** section.

The screenshot displays the SQL Elements Administration interface. At the top, a navigation bar includes tabs for DASHBOARD, EXPLORER, INSTANCES, and ADMINISTRATION. The ADMINISTRATION tab is selected and highlighted with a red box. Below the navigation bar, the main heading is 'ADMINISTRATION'. The interface is divided into two columns. The left column contains sections for 'Users', 'Instances', 'Alert Emails', and 'Health Checks', each with a brief description and a link to manage that feature. The right column contains sections for 'Licensing' and 'Tags'. The 'Licensing' section is highlighted with a red box and contains a description of the license requirement and a link to 'Manage License', which is also highlighted with a red box. The 'Tags' section describes how tags are used to group SQL servers and includes a link to 'Manage Tags'. Below 'Tags' is the 'Discovery' section, which describes automatic discovery of instances and includes links for 'Auto Registration Options', 'Discover Instances', and 'Manage Discovery Options'.

ADMINISTRATION

Users
Give users permission to use SQL Elements. Create, edit and delete users and subscribe to alerts using the Manage Users action.
[Manage Users](#)

Instances
SQL Elements monitors SQL Server instances and their host computers. Add instances to be monitored using the Add SQL Server Instance action.
[Add SQL Server Instance](#)
[Import SQL Servers](#)

Alert Emails
SQL Elements can send email alerts to inform users about critical issues such as availability problems. To receive alert emails, you must configure alerting to use an email server available on your network and sign up to receive alert emails.

[Subscribe to alerts](#)
[Manage Subscriptions For All Users](#)

Health Checks
SQL Elements performs health checks against your monitored instances. You can control at a global level whether health checks are performed. Note that disabling a health check will also stop alert emails from being sent for the health check.
[Manage Health Checks](#)

Licensing
A license is required to access SQL Elements features. View license status and add a license key using the Manage License action.
[Manage License](#)

Tags
Tags are used in SQL Elements to group SQL Servers and help you organize your managed instances. Create, view, edit and delete tags and their associated instances using the Manage Tags action.
[Manage Tags](#)

Discovery
SQL Elements automatically discovers instances on your network. You can trigger instance discovery manually below. You can also configure SQL Elements to automatically monitor all newly discovered instances.

[Manage Discovery Options](#)

SQL Elements opens a new window that displays information relevant to your current license such as type of license, status, expiration date, total licensed servers, license key, and SQL Elements repository.

If you want to add a new license key, type the key under the **New License** section, and click **Apply**.

If you need to buy another license, go to [Click here to buy new SQL Elements license](#).
