

Instance level view

The **Instance Level** view groups information in two tabs, **Logins** and **Roles**.

Logins

The **Logins** tab shows a list of all the logins for a server with the following columns:

Name: The name of a Windows user, Windows group, or SQL user.

Object Type: Windows User, Windows Group, or SQL User.

Member Of: A list of the roles a user is a member of.

Connect Permission: Shows connection permissions as Granted or Denied.

Login Status: Shows a users login status as Enabled or Disabled.

Users and Principals				
Logins Roles
