View database properties

The IDERA SQL Secure **Database Properties** window displays the permissions information associated with the selected database. You can view:

- The owner and status of the selected database
- Whether the guest SQL Server login is enabled on this database
- The account or login (grantee) that was granted or denied permissions on the database
- The type of permission, and whether it was granted or denied
- The account or login (grantor) granting or denying this permission
- The source permission, object, and type from which the effective permission was inherited

You can view **Explicit Only** permissions or **Include fixed role and inherited** permissions, by checking the appropriate option and clicking **Show Permissions**. You can also save or print the database object permissions information by clicking the appropriate icon above the permissions table.
