

View SQL Secure activity

Each time a change or action occurs in IDERA SQL Secure, an event is logged. These logged events appear in the **SQL Secure Activity** view. This log includes collection activity, snapshot configuration changes, SQL Secure login changes, and any other changes made to your SQL Secure settings.

SQL Secure Activity

This window lists changes and events related to SQL Secure administration, data collection, filter rules, and jobs management. This allows you to monitor SQL Secure operations.

Available event data

The following columns are available in the **SQL Secure Activity** logs:

Column	Description
Type	Displays the type of event that occurred
Date and Time	Displays the date and time when the event occurred
SQL Server	Provides the name of the SQL Server instance where the event occurred
User	Provides the name of the user who initiated the event
Category	Provides the category of the event
Code	Displays a description of the code that is used in the event
Description	Displays a short description of the event

You can choose which columns to display on this list, group by columns, save the information, and print it, by going to the menu grid located on the top right section.
