

Mail and Graph icon

Mail icon

The Mail icon  indicates that the corresponding counter will send you an alert when:

- You selected the option to send alerts for the specific server.
- The value for either the 'current' or the latest time frame exceeds threshold level.

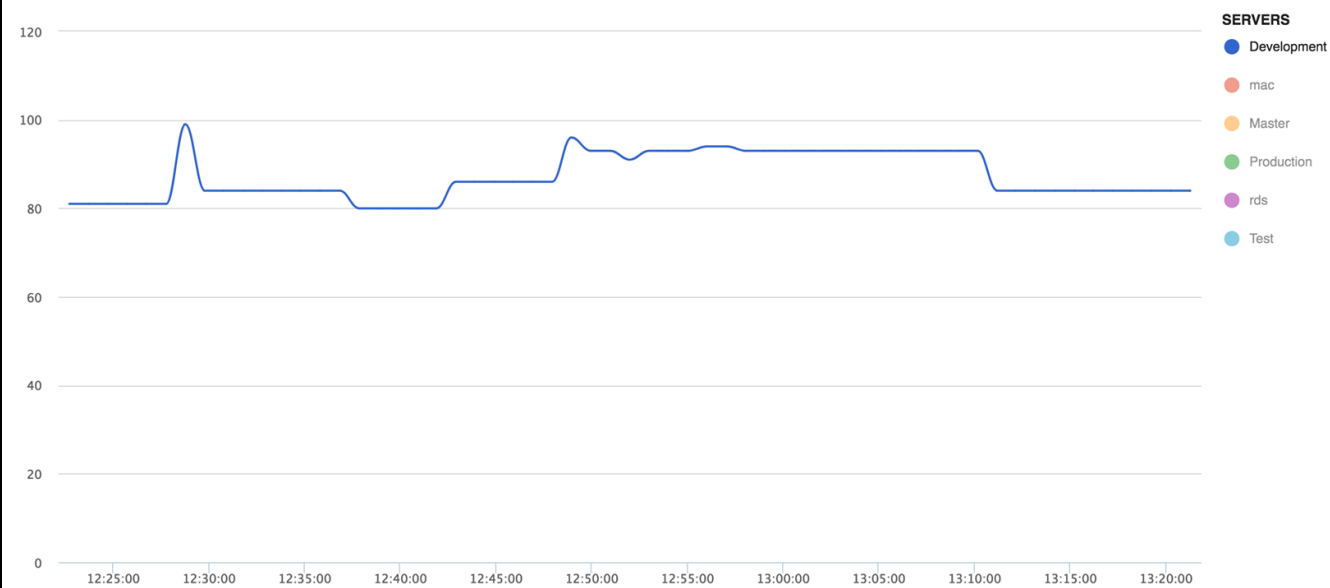

Graph icon

A graph or chart is a type of information graphic or graphic organizer that represents tabular numeric data and/or functions. Graphs are often used to make it easier to understand large quantities of data and the relationship between different parts of the data. Graphs can usually be read more quickly than the raw data that they come from.

When clicking the graph icon  a graph displays, depicting the current status of some metric of the server, which is updated in real-time.

Open connections (Current Connections) / TREND VALUES / Current

Charts and graphs displayed by the Monitors can now be exported in PDF/JPG/PNG formats. To export a chart select the option from the drop-down context menu.
