

What Summary information can you see on the Home tab?

On the right side of your **Home** tab, you can view a summary section with the most important information from your environment. This information is divided in the following sections:

My Environment

In this section you can view the number of:

- **Managed instances** - click this option and SQL Safe takes you to the **Instances** tab
- **Not-contacted instances** - click this option and SQL Safe takes you to the **Instances** tab where you can see the instances in your environment filtered by **Error** status.
- **Not-contacted Backup Agents** - click this option and SQL Safe takes you to the **SQL Safe Agents** tab where you can see those instances whose SQL Safe Backup Agent have an **Error** status.
- **Databases** - click this option and SQL Safe takes you to the **Databases** tab
- **Databases with failed backup** - click this option and SQL Safe takes you to the **Databases** tab filtered by **Error** status.
- **Databases with failed restore** - click this option and SQL Safe takes you to the **Databases** tab filtered by **Error** status.
- **Backup Policies** - click this option and SQL Safe takes you to the **Policies** tab where you can see policies filtered by **Backup** Policy Type
- **Restore policies** - click this option and SQL Safe takes you to the **Policies** tab where you can see policies filtered by **Restore** Policy Type
- **Log Shipping policies** - click this option and SQL Safe takes you to the **Policies** tab where you can see policies filtered by **Log Shipping** Policy Type

Status Details

In this section you can view a summary of the general status of your environment operations. The number of policies with OK and not OK status, and the number of successful and failed operations.

Disk Space Savings

In this section you can view the amount of disk space saved by SQL Safe. You can view this information for Today, this Month, this Year, the total savings, and the ROI (Return on Investment).

SQL Safe provides a built-in calculator to help you calculate your monetary return on your SQL Safe investment. The calculator attempts to measure the time and monetary savings you gain through using the SQL Safe compression scheme. The Return On Investment (ROI) calculator bases your ROI on the total cost of ownership of your storage devices multiplied by the amount of disk space savings you achieve using SQL Safe. SQL Safe defaults to the commonly used estimate of \$200 per GB of storage. You can change this estimate to reflect your particular hardware configuration by accessing the [Basic Configurations](#) of the **General Preferences** window on the **Administration** tab.

SQL **Safe** is a high-performance backup and recovery solution for your SQL Servers. [Learn more](#) > >
