

Viewing Health Check Recommendations for a specific instance

When you go to the IDERA SQL Inventory Manager Instance Details view for a specific instance, you can find a report of the health check recommendations. These health check recommendations are grouped by type and ordered by level of criticality; where:

- Level 3 = Critical
- Level 2 = Warning
- Level 1 = Informational

You can click **Show Details** or click the name of the health check recommendation to access the following options:

- List of databases affected by the health check
- Individually **Dismiss** the health check recommendation for a database
- Individually **Refresh** the status of a database
- Knowledge base of the health check recommendation
- Link to more information about the health check recommendation

If you do not want to see these details, click **Hide Details**. To hide all health check recommendations for this instance, click **Hide recommendations** on the action items bar.

You can also **Dismiss** or **Refresh** at the level of the whole health check recommendation.

Dismissing health check recommendations

When you dismiss a health check recommendation, you do it temporarily and IDERA SQL Inventory Manager ignores it until the health check passes and goes into an alert status again.

Exporting Health Check Recommendations

If you want to export Health Check Recommendations, click **Export** on the action items bar and choose from the following options:

- Export summary of recommendation categories
- Export details for all recommendations
- Export details for selected categories

Then choose the format for exporting: **PDF**, **XLS**, or **XML**. Click **Export**.

IDERA SQL Inventory Manager allows you to export the specific information that you need for the instance that you select so you can perform a better assessment of your environment. For more information about exporting in IDERA SQL Inventory Manager, click [here](#).

The screenshot displays the IDERA SQL Inventory Manager interface. The top navigation bar includes links for Home, Explorer, Instances, and Administration. A search bar is present on the right. The main content area is titled 'Instance Details' for the instance 'QASS-2008VM1\SQL2008_CS'. A prominent message states: 'YOU HAVE 41 HEALTH CHECK RECOMMENDATIONS'. Below this, a summary indicates '39 databases do not have a current backup.' and provides a link to 'Click show details for more information.' A table lists the databases with their backup status and offers 'Dismiss' and 'Refresh' actions for each. The table includes 10 rows of database names and their backup dates. On the right side, a sidebar shows the 'STATUS' as 'UP', 'UPTIME' as '100 %', and 'RESPONSE TIME' as '3 ms'. It also displays 'Health Recommendations' and 'Database Recommendations'. Below this, the 'INSTANCE SUMMARY' section provides details about the SQL Server version, edition, memory, and other configuration parameters. The 'SERVER SUMMARY' section is partially visible at the bottom.

Tip

When you dismiss a health check recommendation, a dialog window opens to confirm this action, you can enable the option **Do not show this warning again** so that IDERA SQL Inventory Manager does not prompt this warning message every time you dismiss a health check recommendation.
