

Azure Setup

Discovering Azure Instances

The **Azure** tab on the **Cloud Discovery Settings** section allows you to set and edit Azure accounts for discovering instances.

The screenshot shows the 'Cloud Discovery Center Settings' dialog with the 'Azure' tab selected. Below the tabs, there is a button labeled 'Add Azure Account'. Below that is a table with five columns: 'Azure Account Name', 'Azure Tenant ID', 'Azure Client ID', 'Azure Client Secret Key', and 'Azure Subscription ID'.

Adding an Azure account

Click **Add Azure Account** and enter the following information on the Azure Account dialog.

Azure Account Name: Name for referencing the Azure account.

Azure Tenant ID: The ID of the AAD directory in which the application resides.

Azure Client ID: The Application ID name.

Azure Client Secret Key: Application ID key.

Azure Subscription ID: Your subscription ID.

The screenshot shows the 'Azure Account' dialog box. It has a title bar with a close button. The main content area contains instructions: 'To enable discovery of SQL Instances or Databases running on Azure VM or Databases requires two setups. Adding an account may results in you being charged by Microsoft for API requests. See more information [here](#)'. Below this are two numbered steps: '1. Azure Setup (get more information on how to do this [here](#))' and '2. SQL Inventory Manager Setup'. Step 1 includes sub-steps 'a. Login into Azure Account > Go to Azure Active Directory and copy Directory ID and paste that as the Tenant ID' and 'b. Go to App Registrations in Azure Active Directory > create new application registration for SIM by entering Name "SIM", select WebApp/Api and provide the SIM URL as sign-on URL'. Step 2 says 'Enter the Azure Tenant ID, Azure Client ID, Client Secret Key below'. Below the instructions are five input fields: 'Azure Account Name:', 'Azure Tenant ID:', 'Azure Client ID:', 'Azure Client Secret Key:', and 'Azure Subscription ID:'. Each field has an information icon (i) to its right. At the bottom, there are three buttons: 'Remove Account', 'Cancel', and 'Save'.

Editing an account

To edit an Azure account click on the gear icon  next to the account name you want to edit and select **Edit**. Once you modify your information on the **Add/Edit** dialog click **Save** to save your changes.

Removing an account

To remove an Azure account click on the gear icon  next to the account name you want to remove and select **Remove**.
