

Managing tags for an instance

The Instance Details view allows you to manage tags for a specific instance. After accessing the Instance Details view for the instance you want to manage, click the pencil icon on the Tags section of the right sidebar.

The screenshot shows the SQL Inventory Manager (SIM) interface. The top navigation bar includes the IDERA logo, a user welcome message, and links for LOG OUT and HELP. The left sidebar has tabs for DASHBOARD, OVERVIEW, EXPLORER, INSTANCES, and ADMINISTRATION. The main content area is titled 'INSTANCE DETAILS' and shows the instance 'AUT-2005-003\SQL2005'. It displays a health check section with 13 recommendations, a list of applications, and two bar charts showing top databases by size and activity. The right sidebar contains an 'INSTANCE SUMMARY' section with details about the SQL Server, a 'SERVER SUMMARY' section, and a 'TAGS' section with a pencil icon for editing.

Database	Size (MB)
SQLdmMo...	105.0
tempdb	8.5
msdb	6.2
master	4.5
model	1.2

Database	Transactions/Sec
tempdb	3
master	2

SQL Inventory Manager opens a window for managing the instance tags. On this window you can:

- Type the name of a new tag, and then click **ADD**. SQL Inventory Manager adds the new tag to the list. You can add several tags at once by separating each name with a semicolon (;).
- Check or uncheck those tags you want to add or remove for this instance. Previously-added and newly-added tags are checked by default.

When you finish making your edits, click **APPLY**.

Tip

You can also remove tags by clicking the tag name on the sidebar without opening the Manage Tags window.

Warning

- The tag name must begin with an upper or lowercase alphanumeric character.
- Your tag name must have a maximum length of 20 characters.
