

Managing users in SQL Inventory Manager

In order for users to access SQL Inventory Manager, you need to grant them access. Additionally, if they want to receive alert emails, you have to enable this option for each user and type the email addresses where they will receive these notifications.

To edit user details, such as the account name, product access, account role, alert subscriptions, email address, or instance permissions, go to either of the following options on the SQL Inventory Manager Administration tab:

- **Users > Manage Users**
- **Alert Emails > Manage Subscriptions For All Users**

The screenshot displays the 'ADMINISTRATION' tab in the SQL Inventory Manager interface. The top navigation bar includes 'DASHBOARD', 'SQLINVENTORYMANAGER(SIM181)', and a user welcome message 'Welcome Simpsons\Administrator' with 'LOG OUT' and 'HELP' links. The main navigation menu has 'OVERVIEW', 'EXPLORER', 'INSTANCES', and 'ADMINISTRATION' (highlighted). A search bar with a 'Go' button is also present. The 'ADMINISTRATION' section is divided into several panels: 'Users' (with a red box around 'Manage Users'), 'Instances' (with links 'Add SQL Server Instances' and 'Import SQL Servers'), 'Alert Emails' (with links 'Configure email (SMTP) settings', 'Subscribe to alerts', and a red box around 'Manage Subscriptions For All Users'), 'Health Checks' (with a link 'Manage Health Checks'), 'Licensing' (with a link 'Manage License'), 'Tags' (with a link 'Manage Tags'), 'Discovery' (with links 'Manage Discovery Options', 'Auto Registration Options', 'Discover Instances', 'Manage Discovery Credentials', and 'Discovery Status'), and 'Custom Inventory Fields' (with a link 'Manage Custom Inventory Fields').

On this window you can see a list of all registered users, their respective email addresses, and whether they are subscribed to alerts.

Edit User

This option allows you to edit the user name, change the role, modify the user's alert subscriptions, and change the email address to where they receive alerts. To edit a user account:

1. Either click the user account name, or check the appropriate box for the user account you want to edit, and then click **Edit User**. SQL Inventory Manager displays the Edit User dialog.
