

Viewing Computer Details

Idera SQL Elements provides you with the computer details of your SQL Server instances host machines.

To access this information, go to the **Instance details** view. On the right sidebar of the window, on the **Instance Summary** section, click the name of the **Host Server** and SQL Elements opens a window with the respective computer details.

INSTANCE DETAILS

AUT-SQLDM-002 [Edit Properties](#) [Refresh Data](#) [Disable Monitoring](#) [Remove](#)

YOU HAVE 48 HEALTH CHECK RECOMMENDATIONS [Hide Health Checks](#)

- LEVEL 3** **Volume C:\ on instance AUT-SQLDM-002 is filling up.** [Show Details](#) [Dismiss](#) [Refresh](#)
Volume C:\ used by instance AUT-SQLDM-002 is at 96% of capacity.
- LEVEL 3** **23 database(s) have never been checked with DBCC CHECKDB.** [Show Details](#) [Dismiss](#) [Refresh](#)
Click show details for more information.
- LEVEL 3** **23 database(s) have never been backed up.** [Show Details](#) [Dismiss](#) [Refresh](#)
Click show details for more information.
- LEVEL 1** **Instance AUT-SQLDM-002 is not configured to optimize ad hoc workloads.** [Show Details](#) [Dismiss](#) [Refresh](#)
Instance AUT-SQLDM-002 has configuration option optimize for ad hoc workloads set to 0.

TOP DATABASES BY SIZE (MB)

Database	Size (MB)

On this window you can get the following information:

- **Computer information**
 - Computer name
 - Full computer name
 - Domain
- **Windows information**
 - Windows version
- **Drive information** - All drives with their capacity and free space.
- **System information**
 - Manufacturer
 - Model
 - Computer type
 - Physical and logical CPUs
 - Physical memory
 - Number of NICs (Network Interface Cards)
- **Hosted instances** - All instances hosted by this computer.
