

Adding SSRS Scale-out instances

IDERA SQL Business Intelligence Manager supports the registration of SSRS instances that form part of a scale-out deployment. To register SSRS Scale-out instances follow these steps:

1. On the **Administration** tab, go to **Add BI Service**.
2. Select **Monitor SSRS**
3. Enter SSRS instances separated by a semicolon.
4. Specify the location of the SSRS ReportServer database and the Reporting Service Database name.
5. Enter your credentials.
6. On the **Finish** screen check your settings click **Back** to make changes, click **Submit** to save your settings.
