Adding SSRS Scale-out instances

IDERA SQL Business Intelligence Manager supports the registration of SSRS instances that form part of a scale-out deployment. To register SSRS Scale-out instances follow these steps:

- 1. On the Administration tab, go to Add BI Service.
- 2. Select Monitor SSRS
- 3. Enter SSRS instances separated by a semicolon.
- 4. Specify the location of the SSRS ReportServer database and the Reporting Service Database name.
- 5. Enter your credentials.
- 6. On the **Finish** screen check your settings click **Back** to make changes, click **Submit** to save your settings.
