

Manage Monitored Services

Add SQL BI Service Instances for monitoring

Use the **ADD BI SERVICE** option to add SQL BI Service Instances for monitoring. For additional information, refer to [Adding Business Intelligence Services for monitoring](#).

Manage Monitored Services

Use the **MANAGE MONITORED SERVICES** option to have a general overview of all monitored BI instances. This view displays information such as the **Component Type**, its **Status**, the **Service** and **Host Name**, the **Authentication User Name**, the **Alert Refresh Time**, and the **Monitoring** status (true or false). You can also **Export** this information to a PDF, XLS, or XML file.

| Manage Monitored Services | | | | | | | Export |
|------------------------------|--|--|-----------------|----------------------|---------------------|------------|--------|

You can also perform actions to either single or several BI instances.

Perform actions on a single BI instance

After you select a SQL Server from the list, you can perform the following actions:

- Edit Properties** Allows you to modify the previously established credentials.
- Export** Allows you to export the information available to a PDF, XLS, or XML file. How much time a query uses the CPU.
- Remove** Allows you to remove instances that you no longer want to monitor.

Additionally, by clicking the gear icon you can also **Change Refresh Interval**, as well as to **Disable Monitoring** temporarily (during maintenance operations) and **Edit Properties**.

Perform bulk actions on several BI instances

After you select more than one SQL Server from the list, you can perform the following bulk actions:

Edit Credentials Allows you to modify the previously established credentials.

Export Allows you to export the information available to a PDF, XLS, or XML file.

Remove Allows you to remove instances that you no longer want to monitor.

Additionally, you can click the gear icon to access the option to temporarily **Disable Monitoring** (during maintenance operations), as well as to **Edit Credentials**.
