

# Software requirements

The following sections provide the software requirements for each SQL Compliance Manager component. For more information, see [Product components and architecture](#).

Support for MS SQL Server software includes case-sensitive servers and databases. Support for Windows operating systems includes English and international versions. **If an operating system service pack is not mentioned**, a service pack is not required for that version of the operating system.

All SQL CM components require .Net 2.0 or later.

Sensitive Column auditing is supported by SQLcompliance Agent 3.5 or later. To use this feature, please ensure you upgrade your agent to at least version 3.5.

This version of SQL CM does not support the Itanium processor architecture. Versions up to and including SQL CM 3.5 continue to operate with Itanium, but no Itanium support is available. SQL CM 3.7 and later support SQL Server 2012 SP1.

## SQL Compliance Manager Windows cluster support

You can install SQL CM on a Windows 2003, 2008, or 2012 cluster. For more information, review the [supported installation scenarios](#) and [Audit a virtual SQL Server instance](#).

## Audited SQL Server

The audited SQL Server computer should meet or exceed the software requirements recommended by Microsoft to run and manage SQL Server databases.

In a clustered environment with virtual SQL Servers, the audited SQL Server is the virtual SQL Server. However, each node (physical computer) in the cluster that hosts the virtual SQL Server must meet or exceed these requirements.

SQL Compliance Manager supports auditing the following Microsoft SQL Server versions.

SQL Server Version	Operating System
MS SQL Server 2014	Windows Server 2008, Windows Server 2012
MS SQL Server 2012 SP1	Windows Server 2008 SP2
MS SQL Server 2008 R2 Standard and Enterprise Editions	Windows Server 2008 R2, Windows Server 2008
MS SQL Server 2008 Standard and Enterprise Editions	Windows Server 2008, Windows Server 2003, or Windows 2000 Server SP4 or later
MS SQL Server 2005 Standard and Enterprise Editions	Windows Server 2003 or Windows 2000 Server SP4 or later
MS SQL Server 2000 Standard Edition SP3 or later *	Windows Server 2003
MS SQL Server 2000 Standard Edition SP2 or later *	Windows 2000 Server SP4 or later
MS SQL Server 2000 Enterprise Edition *	Windows 2000 Server SP4 or later
* SQL Compliance Manager does not support Before-After data auditing on SQL Server 2000 instances. This feature is available only for instances using SQL Server 2005 and above.	

## Collection Server

Ensure each Collection Server computer meets or exceeds the following software requirements. The Collection Server hosts the Collection Service and the Repository databases, which store SQL CM configuration and audit data.

**If you plan to audit instances running SQL Server 2005 or later**, install the Collection Server on a computer hosting the highest version of SQL Server running in your environment. For example, to accept event data from audited instances running SQL Server 2012 SP1, the Repository databases must reside on a SQL Server 2012 SP1 instance.

The Repository must reside on a version of SQL Server that is greater than or equal to the highest audited SQL Server version.

Software Type	Requirement
---------------	-------------

Operating System	<p>The Collection Server requires one of the following operating systems:</p> <ul style="list-style-type: none"> <li>• Windows Server 2012 R2</li> <li>• Windows Server 2012</li> <li>• Windows Server 2008 R2</li> <li>• Windows Server 2008 SP1</li> <li>• Windows Server 2003 SP2</li> <li>• Windows 2000 SP4</li> <li>• Windows XP SP3</li> <li>• Windows Vista SP2+</li> <li>• Windows 7 SP1+</li> <li>• Windows 8</li> </ul>
Microsoft SQL Server	<p>The Collection Server requires one of the following versions of Microsoft SQL Server:</p> <ul style="list-style-type: none"> <li>• MS SQL Server 2014</li> <li>• MS SQL Server 2012 SP1</li> <li>• MS SQL Server 2008 R2 Standard and Enterprise Editions</li> <li>• MS SQL Server 2008 Standard and Enterprise Editions</li> <li>• MS SQL Server 2005 Standard and Enterprise Editions</li> </ul>

## Management Console

Ensure each console computer meets or exceeds the following software requirements. You can install the console on the Collection Server computer, or any client computer for remote access to your audit data.

Software Type	Requirement
Operating System	<p>The Collection Server requires one of the following operating systems:</p> <ul style="list-style-type: none"> <li>• Windows Server 2012</li> <li>• Windows Server 2008 R2</li> <li>• Windows Server 2008 SP1</li> <li>• Windows Server 2003 SP2</li> <li>• Windows 2000 SP4</li> <li>• Windows XP SP3</li> <li>• Windows Vista SP2+</li> <li>• Windows 7 SP1+</li> <li>• Windows 8</li> </ul> <p>The Management Console computer also requires Microsoft Data Access Components (MDAC) 2.6 or later. If you plan to audit SQL Server 2005 instances, upgrade to MDAC 2.8 or later. SQL Server 2005 requires MDAC 2.8 to communicate with other applications.</p>
Documentation	Internet Explorer 7.0 or later

## Agent

Ensure the computer where the agent resides meets or exceeds the following software requirements.

Software Type	Requirement
Operating System	<p>The agent requires one of the following operating systems:</p> <ul style="list-style-type: none"> <li>• Windows Server 2012 R2</li> <li>• Windows Server 2012</li> <li>• Windows Server 2008 R2</li> <li>• Windows Server 2008 SP1</li> <li>• Windows Server 2003 SP2</li> <li>• Windows 2000 SP4</li> <li>• Windows XP SP3</li> <li>• Windows Vista SP2+</li> <li>• Windows 7 SP1+</li> <li>• Windows 8</li> </ul>
Documentation	Internet Explorer 7.0 or later
