

# Edit Status Alert wizard - Finish Status Alert Rule tab

Specify a name for the different alert rule, review the rule details, and then click **Finish**. When you finish this wizard, SQL Compliance Manager applies your changes.

## Available actions

**Specify rule name**

Allows you to name your alert rule. Consider using a unique name that reflects the purpose of the alert.

**Specify alert level**

Allows you to set the severity alerts generated by this rule should have. SQL CM tallies the alerts by severity on the Audited SQL Servers Summary tab.

**Specify rule description**

Allows you to provide a description for this alert rule. Consider including detailed information that can help you diagnose issues later.

**Enable rule now**

Indicates that you want SQL Compliance Manager to begin monitoring the product component status using this alert rule criteria immediately after you finish creating the rule. By default, all alert rules are enabled upon creation.

**Review rule details**

Allows you to change your specified alert rule criteria before applying your new alert rule. To edit previously set criteria, click the corresponding setting.

SQL Compliance Manager audits all activity on your server. [Learn more](#) > >
