

# New Event Filter wizard - Finish Event Filter tab

The Finish Event Filter tab allows you to specify a name for the new event filter, review the filter details, and then click **Finish**. When you finish this wizard, SQL Compliance Manager enables the event filter and begins applying your filter criteria against audited events associated with the selected objects.

*If you want to change a setting now*, use the filter details pane. You can also change event filter settings later using the Edit Event Filter wizard.

## Available actions

### Specify filter name

Allows you to name your event filter. Consider using a unique name that reflects the purpose of the rule.

### Specify filter description

Allows you to provide a description for this event filter. Consider including detailed information that can help you diagnose issues later.

### Enable filter now

Indicates that you want SQL Compliance Manager to begin filtering events using this rule criteria immediately after you finish creating the rule. By default, all alert rules are enabled upon creation.

### Review filter details

Allows you to change your specified event filter rule criteria before applying your edits. To edit previously set criteria, click the corresponding setting.

SQL Compliance Manager audits all activity on your server. [Learn more](#) > >
