## Use the Console to groom events

When you groom events using the Management Console, IDERA SQL Compliance Manager also performs the following actions:

- Checks the integrity of the collected events to ensure you are grooming uncompromised data. If the audit data for the selected SQL Server instance fails this integrity check, SQL Compliance Manager does not groom the data.
- Logs the event in the Change Log.

## To groom archived events:

- 1. Click Auditing on the menu bar, and then select Archive and Retention > Groom Audit Data Now.
- 2. Specify the appropriate settings, and then click **OK**.

SQL Compliance Manager audits all activity on your server. Learn more > >
