

Select counter type and counters

The Select Counters page allows you to choose the counters you want to include in your report. You can select up to 10 counters from all of the counters that SQL diagnostic manager currently collects.

Add Custom Report

Select the counters that you would like to include in your custom report.
Choose a counter type and the specific counter that you would like to report on

SQL diagnostic manager gathers Windows and SQL Server counters as well as the custom counters that you have created. Please choose which of these counters you would like to include in this custom report.

Available Counters

- ☒ Operating System Counters
- ☐ SQL Server Counters
- ☒ Virtualization Counters
- ☐ Custom Counters

To select the counters you want to include in your custom report:

1. Check the box next to the type of counters you want to include with your report to view an alphabetical list of counters. You can select counters from the following groups:
Select one or more counters from the Available Counters list, and then click **Add** to include it in your report.
 - Operating System Counters.
 - SQL Server Counters.
 - Virtualization Counters for both Hyper-V and VMware server virtualization platforms.
 - Custom Counters.
2. **If you want SQLdm to display tabular data**, check the **Show tabular data in report** box.
3. Click **Next**.

SQL **Diagnostic Manager** identifies and resolves SQL Server performance problems before they happen. [Learn more > >](#)
