

VM Resource Limits Detected alert

The VM Resource Limits Detected alert indicates that CPU or memory resource limits are set for the virtual machine hosting the monitored SQL Server instance. Resource limits are set by the VM administrator on the total amount of resources that a VM is allowed to consume. This alert is disabled by default and is available only on instances hosted on virtual machines that are enabled for VM monitoring.

SQL [Diagnostic Manager](#) identifies and resolves SQL Server performance problems before they happen. [Learn more](#) > >
