

Access alert details

The Alerts Detail screen in the SQLdm web console provides you with detailed statistics on your alerts.

On the Alerts Detail screen you can find the following information:

- Alert Name
- Instance Name
- Value (description)
- Warning Threshold
- Critical Threshold
- Current alert time
- Alert Details

Additional button options

Category

Click the **SHOW CATEGORY DETAILS** button to access first the Overview tab of a single instance and then specific category views such as sessions, queries, query waits, resources, databases, and alerts.

Instance

Click the **SHOW INSTANCE DETAILS** button to access the single instance dashboard for a specific instance.

Close

Click the **CLOSE** button to exit the Alerts Detail screen.

Prev

Click the **PREV** button to view details for a previous alert.

Next

Click the **NEXT** button to view details for the next alert.

Access the Alerts Detail screen

SQLdm provides several paths to access the Alerts Detail screen. The first access path is by clicking any row in the alerts roll up view of the Alerts tab. The second access path is by clicking the **Show Alert** link of a category icon that contains active alerts in the thumbnail or heatmap sub-views. It is also possible to access the Alerts Detail screen through the main SQLdm web console dashboard and specific widgets.

SQL **Diagnostic Manager** identifies and resolves SQL Server performance problems before they happen. [Learn more](#) > >
