Availability Group Synchronization Health alert

The Availability Group Synchronization Health alert provides the database synchronization state in the availability group. Possible values include: not healthy, partially healthy, and healthy.

For more information on configuring alerts and setting thresholds, see Configure alerts.

> ✓ Create an alert response bundle with the Availability Group Synchronization Health alert and related alerts. For additional information, see Create alert response bundles.

SQL Diagnostic Manager identifies and resolves SQL Server performance problems before they happen. **Learn more** > >
