

OLE Automation Disabled alert

The OLE Automation Disabled alert indicates that the OLE automation configuration option is disabled in SQL Server 2005 or the procedures are dropped in SQL Server 2000 for the SQL Server instance. SQL Diagnostic Manager does not collect data such as OS metrics and service details using OLE automation. Use the OS Metrics tab of the server Properties dialog to reconfigure this option. For additional information about OS metrics collection, see [Configure OS metrics monitoring](#).

SQL **Diagnostic Manager** identifies and resolves SQL Server performance problems before they happen. [Learn more >>](#)
