Specify databases and objects

This window allows you to select which databases you want to audit using IDERA SQL Secure.

Options	Description
User databases and System databases	For some objects, the **Scope Matches** column allows you to select if you want to use **System**, **User**, or both (**System or User**) databases types for your snapshot.
Databases names matching	- Select **Any** if you want to include all databases names in your snapshot. - If you want to specify strings that your filter will use to match the names of your databases, click **Any** on the **Name matches** column, and a new window opens. In the list of available elements, click the elements you want to move to the **Selected** list, and then click **Add**. You can search for a specific element by typing a specific string in the **Enter match string** field (you can use wildcards), and then click **Add**. The string added to the **Match strings** field. You can also remove strings from this box by selecting the string and clicking **Remove**.

To create the filter click **OK**.
