

## Configure Management Console preferences

SQL Defrag Manager allows you to modify many of the default settings of the application, and you can change your Console preferences at any time. Reconfiguring these preferences allows you to modify settings in the following categories:

- Alerts
- Recent activity
- Repository
- User Experience

### Configuring Email alert notifications

You can [configure email settings](#) in SQL Defrag Manager to send Email alert notifications regarding fragmentation using the Default Email Configuration window. To open the Default Email Configuration window, click **Email Configuration** on the SQL Defrag Manager command menu of the SQL Defrag Manager Console.

### Configuring recent activity

By default, SQL Defrag Manager only displays the last 1000 actions on the Recent Activity pane. Starting with version 3.5 users can [configure this value](#) in the SQL Defrag Manager Console or through the command line.

### Changing the SQL Server Repository

You can [change the SQL Server repository](#) using the SQL Defrag Manager Console. To open the Connect to Repository window, click the **Connect** icon at the top left edge of the SQL Defrag Manager Console.

### Changing user experience settings

The SQL Defrag Manager Console provides multiple styles that change the appearance of the Console. You can choose which style you prefer to use. To select a style, click the **Style** icon at the top left edge of the SQL Defrag Manager Console, as shown in the following image.
