

The SQL DM for MySQL API

SQL DM for MySQL API is an application programming interface that enables SQL DM for MySQL to interact with other software like a command shell or a script or application. To use the SQL DM for MySQL API you send a HTTP request simply (specifying the SQL DM for MySQL URL with parameters) and thus even the address line of any browser can be used. Configure SQL DM for MySQL and perform other actions (like you will be able to from GUI). The APIs are capable of managing the servers (Adding, Editing, and Removing) along with managing data collection and alert settings.
