

# Upgrading using the CLI utility

Before starting the update using the CLI utility, you must download the latest infra hotfix for version 9.8.0 and install it on the Precise FocalPoint. Verify that you completed all action items before starting the update.

## To apply the upgrade update

1. Run the CLI i3-update-load command to load the upgrade.zip file:

**Windows**    `infra\bin\psin_cli.bat`  
                 `-action i3-update-load`  
                 `-i3-user admin`  
                 `-i3-clear-password admin`  
                 `-zip-file Precise DVD\Upgrade to v9.8.0\Upgrade.zip`

**UNIX**        `./infra/bin/psin_cli.sh`  
                 `-action i3-update-load`  
                 `-i3-user admin`  
                 `-i3-clear-password admin`  
                 `-zip-file Precise DVD\Upgrade to v9.8.0\Upgrade.zip`

2. Run the CLI i3-update-prepare command to prepare the update:

**Windows**    `infra\bin\psin_cli.bat`  
                 `-action i3-update-prepare`  
                 `-i3-user admin`  
                 `-i3-clear-password admin`  
                 `{-servers "<servers>" | -all-servers true}`  
                 `-updates-ids V980_UPGRADE`

**UNIX**        `./infra/bin/psin_cli.sh`  
                 `-action i3-update-prepare`  
                 `-i3-user admin`  
                 `-i3-clear-password admin`  
                 `{-servers "<servers>" | -all-servers true}`  
                 `-updates-ids V980_UPGRADE`

3. Run the CLI i3-update-install command to apply the update:

**Windows**    `infra\bin\psin_cli.bat`  
                 `-action i3-update-install`  
                 `-i3-user admin`  
                 `-i3-clear-password admin`  
                 `{-servers "<servers>" | -all-servers true}`  
                 `-updates-ids V980_UPGRADE`

**UNIX**        `./infra/bin/psin_cli.sh`  
                 `-action i3-update-install`  
                 `-i3-user admin`  
                 `-i3-clear-password admin`  
                 `{-servers "<servers>" | -all-servers true}`  
                 `-updates-ids V980_UPGRADE`

4. Perform the post-update action items that appear.
