

Viewing all your monitored SQL Server jobs

The **Jobs** tab allows you to view the complete list of your monitored jobs, job trending graphs, and job chaining options.

Go to the following sections to get more information about:

- **Jobs** - get the most important information of your jobs, their status, and perform actions like starting or stopping a job for example. This section is displayed by default in the **Jobs** tab.
- **Job Trend** - view graphic representations and trending lines of the most important information of your environment.
- **Job Chains** - tie several jobs together in a job chain to create dependencies among jobs and schedule their execution in one server or across multiple servers.

SQL **Enterprise Job Manager** monitors and manages your SQL Server agent jobs. [Learn more > >](#)
