

Precise Report Manager New User Interface Notes

- When logged into the new Precise HTML user interface, drilling into an application, and then clicking **Reports** on the upper right-hand side launches the new Report Manager UI.
- In the old Report Manager UI, the **Rerun** button inside the View Report page is now located outside on the Reports List page along with other buttons on the bottom tab, such as **View**, **Properties**, etc.
- In the new Report Manager UI, when editing a customized report, the **Spreadsheet** button is disabled until the Execute action is performed once.
