

Availability Group Role Change alert

The Availability Group Role Change alert indicates when the primary role changes to a secondary replica. Alert includes affected databases for the entire availability group.

For more information on configuring alerts and setting thresholds, see [Configure alerts](#).

Create an alert response bundle with the Availability Group Role Change alert and related alerts. For additional information, see [Create alert response bundles](#).

SQL [Diagnostic Manager](#) identifies and resolves SQL Server performance problems before they happen. [Learn more >>](#)
