

Mark SQL Safe backup files inactive

You can manually mark any SQL Safe backup that is stored on your TSM Server as inactive using the command line interface (CLI).

An example CLI code snippet that uses the expire command

```
SQLsafeCmd expire TSM -BackupFile c:\NW_full.safe -TSMHighLevel Backup  
-TSMLowLevel SQL SafeDEV01_SQL2000_Northwind_Full_2005300847.safe -age  
7 days.
```

TSM is case sensitive. Be careful when specifying the High Level and Low Level file set.

For more information about available [expire TSM options](#), see the usage statements in the CLI Help. To view the CLI Help, type `SQLsafeCmd help expire TSM`.
