

# View assessment change log

The **Change Log** tab lists all changes that have been made to the selected published assessment. After you publish an assessment, IDERA SQL Secure begins tracking any change that has been made to the assessment's settings. These changes may include the addition or removal of audited instances as well modifications to the security checks to be performed by the assessment.

The change log gives you an electronic, "paper trail" that documents exactly how a published assessment is being processed during an internal or external audit review.

## Available actions and fields at the Change Log tab

In the **Change Log** tab you have the following available actions:

### Edit or View Assessment Settings

Allows you to edit or view the configuration settings for the published assessment, such as the security checks the assessment performs. Any changes performed to the assessment settings will be recorded in the Log entries.

If your SQL Secure login does not have administrator permissions , you can only view assessment settings.

### Refresh Audit Data

Allows you to re-run this assessment using different audit data (up to a specific point in time). Each time you refresh the audit data, SQL Secure registers the action in the [Change Log](#).

The following columns are displayed in the **Log Entries**:

### Changed At

Provides the date and time at which the change occurred.

### Assessment Status

Indicates the assessment status (published or approved) at the time of this change. Once an assessment is approved, only the assessments notes can be changed. Changes are not tracked when an assessment is in the draft status.

### Changed By

Provides the name of the SQL Secure login who applied the change.

### Change

Describes what change was applied.
