

Manage SQL Secure logins

The **Logins** window allows you to view a list of logins that are active in IDERA SQL Secure. This list provides the name, type of login, SQL Server access, and permissions in SQL Secure for each login. From this window, you can add new logins, delete logins, and edit login properties.

Logins

Hide tasks

This window allows you to manage SQL Secure users. Use this window to create new users and modify rights of an existing user.

SQL Secure Logins (8 items)

Name	Type	SQL Server Access	Permissions in SQL Secure
 WINDEV2204EVAL\User	Windows User	Grant	Can configure settings and view audit data
 NT SERVICE\SQLWriter	Windows User	Grant	Can configure settings and view audit data
 NT SERVICE\Winmgmt	Windows User	Grant	Can configure settings and view audit data
 NT Service\MSSQLSERVER	Windows User	Grant	Can configure settings and view audit data
 NT AUTHORITY\SYSTEM	Windows User	Grant	None
 NT SERVICE\SQLSERVERAGENT	Windows User	Grant	Can configure settings and view audit data
 NT SERVICE\ReportServer	Windows User	Grant	None
NT SERVICE\SQLTELEMETRY	Windows User	Grant	None

 A user must have a SQL Secure login to use SQL Secure features, such as Reports.

Each SQL Secure access level maps to a specific SQL Server role that SQL Secure provides in the Repository. You can assign these SQL Secure roles to an existing login using SQL Server Enterprise Manager or Management Studio.

The following information is displayed in the **Logins** window:

Column	Description
Name	List the logins that are associated with the SQL Secure Repository database.
Type	Describes the type of login (Standard, windows Group, Windows User)
SQL Server Access	Describes the type of access the user has on the SQL Secure Repository database.
Permissions in SQL Secure	Describes the type of access the user has within the SQL Secure Console.

To know how to add or edit logins, go [Add New Login](#) and/or [Edit Login settings](#).
