

Enable email notification

The **Configure Email Notification** section allows you to determine the way email notifications are sent after a snapshot is collected. You can set the following notifications:

- Email notifications sent after a snapshot is collected successfully, or only if there are warnings or errors. (Always, On Warning and Error, or Only On Error)
- Email notifications sent depending on the level of the security risks discovered. (Any Risk, On High and Medium Risks, or Only on High Risks)

Register a SQL Server

Configure Email Notification
Select whether email notifications should be sent after each snapshot.

☒ Send Email Notification after Data Collection

☐ Always

☐ On Warning and Error

☒ Only On Error

☒ Send Email Notification for Security Findings

☐ Any Risk

☐ On High and Medium Risks

☒ Only on High Risks

Email Recipient

(specify multiple email recipients by separating each address with a semicolon)

< Back Next > Cancel Help

Once you have configured when notifications are sent, specify who should receive these emails by specifying the appropriate email address in the **Email Recipient** field. To enter multiple email addresses, separate each address with a semi-colon.

If you do not want to receive email notifications for snapshots status or security findings, uncheck **Send Email Notification after Data Collection** and **Send Email Notification for Security Findings**.

Email notifications cannot be sent until IDERA SQL Secure has been configured to communicate with your SMTP provider. You can configure these settings by selecting **Tools > Configure SMTP Email** from the menu bar. For more information, see [Configure Email Settings](#).

Click **Next** to continue.

Take into account that when you have no policies created yet, the wizard will go directly to the [Take a Snapshot](#) section. However, the new registered SQL Server will be automatically added to the default **All Servers** policy and to any other policies defined with **Automatic Policy Membership**.

SQL Secure provides an option to make bulk changes to email notification settings.
