

Save new assessment

Use the **Save as New Assessment** option to create a new assessment that uses the same audit data and settings of an existing assessment. Specify a unique name and description for this new assessment, and then click **OK**.

To **Save as New Assessment** use any of the following options

- Right-click an existing policy or assessment from the Policies tree of the **Security Summary** view. Select **Save as New Assessment**.
- Select an existing policy or assessment from the Policies tree of the **Security Summary** view. Click **Save as New Assessment** from the ribbon options of the **Summary** tab.

Both options open a new window where you have to specify the name for the new assessment and the description.

Save as New Assessment

Create a new draft assessment from this policy:
CIS for SQL Server 2019

Name: Assessment1

Description: Center for Internet Security - Security Configuration Benchmark for Microsoft SQL Server 2016, v1.0.0, August 17, 2017

OK Cancel Help

✓ Consider using a name and description whose details will help you later when you refer back to this assessment.

⚠ Explanation notes associated with security checks in the selected assessment are not copied to the new assessment. To transfer notes from one assessment to another, [compare the assessment security checks](#) and then select which explanation notes you want to copy.
