

Add server group tags

In the **Add to Server Group Tag** section, you can specify which tags you want to apply to the SQL Server you are registering. Tags allow you to group SQL Servers for better management as you are making changes to the group as a whole instead of to each SQL Server individually. By default, the **All Servers** tag is already added.

Register a SQL Server

Add to Server Group Tag
Select tag(s) to add new server to.

Server Group Tag	Description
<input checked="" type="checkbox"/> All Servers	All Servers

Add Edit Remove

< Back Next > Cancel Help

Select the tag you want to apply, and then click **Add**. You can add as many tags as you require. If you want to change or delete any of the previously added tags, click **Edit** or **Remove** respectively.

If no tag is selected, SQL Secure applies the **All Servers** tag.

Click **Next** to go to [Select SQL Server objects to audit](#).
