

Sending notifications in the IDERA Dashboard

The Send Notification to All Users widget of the Administration view, allows users to send a product upgrade warning message to all users.

To send a notification:

1. Select **Send Notification** in the Administration view, and the Send Notification to All Users window displays:

The screenshot shows the IDERA Dashboard Administration view. The top navigation bar includes the user 'simpsons\administrator', the 'Administration' tab, and a 'Help' link. The main content area lists several configuration options: 'Configure Navigation Order', 'Configure Dashboard Views', 'Customize DBA Dashboard', and 'Send Notification to All Users'. The 'Send Notification to All Users' widget is highlighted with a green border. It contains a text input field labeled 'Specify message to inform users' and a 'Send' button. Below the input field, there is a 'Manage Licenses' link. The text 'censes action.' is partially visible to the right of the input field.

2. Type your warning message and click **Send**.
3. A preview of your warning displays. If you want to proceed, click **OK**.

SQL Diagnostic Manager for SQL Server performance monitoring, alerting, and diagnostics for SQL Server.
