# **Create custom dashboards**

The Custom Dashboards tab of the SQL Diagnostic Manager web console allows you to create and view custom dashboards. You can define and save multiple dashboard views to compare metrics across your monitored SQL Server instances.

### dashboard

To add a dashboard:

- 1. Click Add a Dashboard in the Custom Dashboards view.
- 2. Type a dashboard name on the Add a Dashboard window.
- 3. Select the Default check box, if you want to set this dashboard as the default one.
- 4. Click Save.

## Add widgets to your dashboard

Customize your dashboard by adding widgets to display specific SQL Diagnostic Manager metrics. You can add a widget at a time.

#### To add a widget to your dashboard:

- 1. Click Add a Widget in the Edit Dashboard view.
- 2. Type a label for your widget in the corresponding box or leave it empty for default.
- 3. Select a widget type.

001001 0	muget type	<i>.</i>			
Label:			(optional	- leave empty for default)	
Widget:	Single Value	Mini-timeline	Value and Timeline	List of Values Maria Ender Maria Ender Ma	Large Timeline
Metric:	(choose a metri	c value)		•	
Data Source:	Single Instance	•			
	ldentifie	ir:		v	
Save	Cancel				

- 4. Choose a metric from the drop-down list.
- 5. Choose a data source from the drop-down list. Available options vary according to the type of widget selected and include:
  - Single Instance
  - Multiple Instance
  - Tag Name
  - All Instances
- 6. Choose an identifier or identifiers from the drop-down list. Note that if you select the All Instances data source option, it is not possible to assign an identifier.
- 7. Click Save.

## Actions to perform in your Custom Dashboards View

The SQL Diagnostic Manager web console allows you to perform the following actions in your Custom Dashboards view:

- Filter your results by timeframe
- Edit your dashboard
- Remove your dashboard
- Duplicate your dashboard

	Database Full (Percent) OS Memory Usage (Percent)		
	10.31.193.145\SQL2014 0.0 Details 61.10 61.05 61.00 60.95 60.90 05-03 02:3 PM 05-04 0	Thu May 03 15:02 Current Value Senis 60.89 10.31.190.1	
	SQL Server Memory Usage (Percent) Instances Current Trend 10.31.193.146/SQL2 0.0		

To display a widget in full size, click Details.

## Filter results by timeframe

Filter results in your dashboard by specific built-in periods from the Live list or by specific start and end dates in the historic timeframe option.

By default, the results timeframe is the current date.

## Edit your dashboard

In the Edit Dashboard view, you can:

- Change your dashboard name.
- Set your dashboard as the default one by selecting the Default check box.
- Select or create a dashboard tag by typing a name in the Dashboard Tags box.
- Add a new widget, remove, or edit current widgets.
- Place and order widgets in your dashboard by dragging and dropping them.

To access to the Edit Dashboard view, click Edit Dashboard in the Custom Dashboards view.

Click **Save** after making changes in the Edit Dashboard view.

#### Remove a dashboard

To remove a dashboard, click Remove Dashboard and then select OK on the Confirmation window.

## **Duplicate a dashboard**

To duplicate a dashboard, click Duplicate Dashboard.

SQL Diagnostic Manager for SQL Server performance monitoring, alerting, and diagnostics for SQL Server.
