Schedule multiple baselines
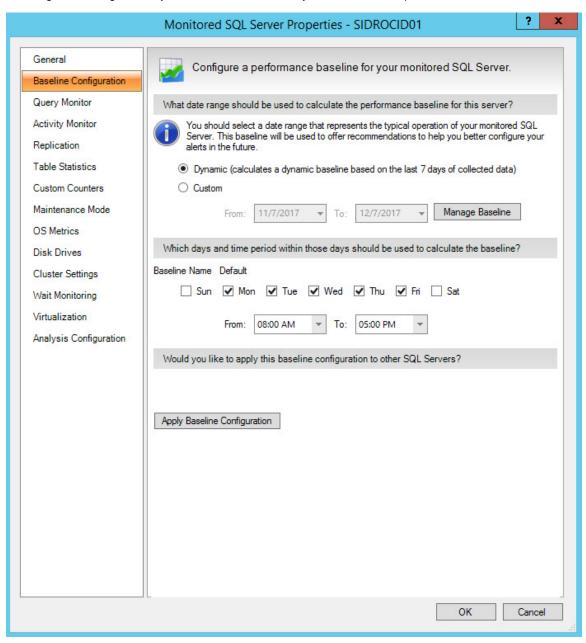

SQL Diagnostic Manager allows you to define and schedule any number of baseline periods in addition to the default one.

To add a new baseline:

1. Click **Manage Baseline** to display the Manage Baseline window.

2. Type a name in the **Baseline Name** field.
3. Select Dynamic to use the default options or select Custom to set the date range, the days, and the time period to calculate the baseline performance for the server.
4. Select the days and time period to schedule when to apply baseline to the server.
5. Click **Add** to save the created baseline, click **Edit** to edit the baseline, or click **Delete**.
6. Click **Save.**

✓ The baseline period you specify should represent a typical operation of the monitored SQL Server instances to which this baseline applies.

⊘ SQL Diagnostic Manager allows only one baseline in effect at any time.

To edit a baseline:

1. Click **Manage Baseline** to display the Add baseline window.
2. Select the baseline you want to update from the **Baseline Name** list.
3. Modify days and time period as desired.
4. Click **Save**.

⚠ When you schedule a new baseline, the changes are applied to the next day or when the baseline is refreshed (test this behavior when the feature is available).

SQL Diagnostic Manager for SQL Server performance monitoring, alerting, and diagnostics for SQL Server.
