

SQL Server Error Log alert

The SQL Server Error Log alert indicates that specific text appeared in the SQL Server log. You can customize which text triggers the alert.

The default settings are:

- 11 - Warning
- 18 - Critical

Use a size limit on your SQL Server Error log

SQL Diagnostic Manager allows you to limit the size of your SQL Server Error log to help improve response time and avoid using unnecessary space on your server. For additional information and steps on setting this limit, see [Configure text and expression alerts](#).

Create an alert response bundle with the SQL Server Error Log alert and related alerts. For additional information, see [Create alert response bundles](#).
