

# Notifying users about product upgrades in the IDERA Dashboard

The Send Notification to All Users widget of the Administration view lets you send a notification to all user accounts added to IDERA Dashboard. Use this feature to notify users about product upgrades and other issues affecting product use.

## To send notification to all users:

1. Click the **Send Notification** link and a pop-up window displays.

 The pop-up window has a title 'Specify message to inform users'. It contains a large text input field with a placeholder for the message. Below the input field is a 'Send' button.

2. Type the message you want to send, and click **Send**.
