

# Manage audited instances

The IDERA SQL Compliance Manager Instances view displays the status of audit activity across your SQL Server environment. Use the statistics and graphs on this view to quickly and easily identify issues so you can continue to ensure the correct level of compliance. Be sure to review the associated topics about managing properties for the registered SQL Server instance and the Agent:

- Viewing instance details

The screenshot displays the 'Audited Instances' view in the IDERA SQL Compliance Manager. The interface includes a sidebar for filtering and a main table of instances. The table contains the following data:

Instance Name	Status Text	Number Of Audited ...	SQL Server Version	Audit Status	Last Agent Contact
WIN-N23BE3A8D5G	OK	11	Microsoft SQL Server 2016 (RTM)	Enabled	Feb 01 2019 03:16 PM

The status 'OK' is highlighted with a green icon. The bottom of the table shows '1 Total Items' and '50 Items per page'.

Configuration can be set up via the SQL Compliance Manager Windows Console.

## Available actions

### Filtering

Allows you to filter the listed instances by status, instance name, status text, number of audited databases, SQL Server version, audit status, and timestamp for the last time the agent was contacted.

### Export

Allows you to export the list of audited SQL Server instances in PDF, XLS, or XML format.

### Refresh

Allows you to update the Audited Instances list with current data.

Click the name of a SQL Sever Instance to open the Instance Details view for the selected instance.
