Reviewing details for manual restore

You are ready to start the restore operation, but if you want to change any of the restore settings, you can go to the previous sections and change the respective configurations.

You can click **Generate Script** to generate the respective Command Line and T-SQL scripts with all restore configurations. For more information about generating scripts, click here.

What do you do next?

After you have reviewed the information on the **Finish** section, click **Finish** to submit the restore job immediately. You can view its status in the Operation History tab.
