

# Create Policies CLI Commands

SQL Safe provides you with CLI commands to help you manually create new policies.

To create policies use the following command:

- `SQLsafeCmd Create-Policy <policy_type> <policy_name> [options]`

Where:

Action	Description
<policy_type>	Type of the policy.  Valid types: Restore, Backup, LogShipping.
<policy_name>	Name of the policy.

## Advanced Options

The following advanced options help you create policies:

Options	Description
-ArgsFile <filename>	The path to a file containing command-line arguments.  <filename> - specifies the file that contains the command line arguments.

The following topics are included in this section:

- [Create Backup Policies CLI Commands](#)
- [Create Log Shipping Policies CLI Commands](#)
- [Create Restore Policies CLI Commands](#)

For detailed descriptions and available options, see the CLI Help (`SQLsafeCmd help Create-Policy`).

SQL **Safe** is a high-performance backup and recovery solution for your SQL Servers. [Learn more > >](#)
