

# Use reports to establish and maintain compliance

You can use IDERA SQL Compliance Manager reports to show that your organization is following SQL Server compliance policies or that the procedures you developed are having a positive impact on the way that SQL Server is used in your environment.

Once compliance is established, SQL Compliance Manager Reports allow you to track activity and identify problems so that you can resolve these issues and maintain compliance. In addition to the ability to generate compliance reports on your SQL Server environment, you can also assign read-only access to SQL Compliance Manager to designated users so they can generate necessary reports.

SQL Compliance Manager audits all activity on your server. [Learn more](#) > >
