

Attach Archive Database window

The Attach Archive Database window allows you to open an archive database so you can view and report on previously collected audit data.

Available fields

Archive Database

Allows you to select which archive database you want to attach. To view all available databases on the registered SQL Server instances, click **Show all databases**.

Archive Information

Provides general information about the archive database you selected, such as the name of the corresponding SQL Server instance and the last date the archive was updated.

SQL Compliance Manager audits all activity on your server. [Learn more](#) > >
