

## What is IDERA SQL Comparison Toolset?

Data schema and data comparison is sometimes an extremely time consuming and confusing task when completed manually, and the process can be prone to error. Rather than spending hours digging through and scrutinizing data and the overall database structure, then manually generating scripts, wouldn't it be much easier if there was a tool to automate this process?

IDERA SQL Comparison Toolset provides an easy, automated way to compare schema and data, generate synchronization scripts, and deploy those scripts to synchronize databases. Whether migrating changes from test to production or repairing unwanted changes, IDERA SQL Comparison Toolset saves you time and reduce the headaches of performing manual database comparisons mistakenly applied and unwanted changes.
