

SQL Enterprise Job Manager Home

SQL Enterprise Job Manager provides the following features:

- Broad visibility in an intuitive Outlook-style interface of all your scheduled, executed, and currently running SQL Server jobs across your environment.
- Simple and actionable user interface that helps you edit/delete and add new jobs.
- Receive your selected alert notifications for the most critical job status so you can take actions as needed.
- View job history and access information of the scheduled jobs.

SQL Enterprise Job Manager monitors and manages your SQL Server agent jobs. [Learn more >>](#)
