# Configuring your browser for Windows Authentication

In order to be able to use Windows Authentication to log into SQL Enterprise Job Manager, you have to configure your browser settings.
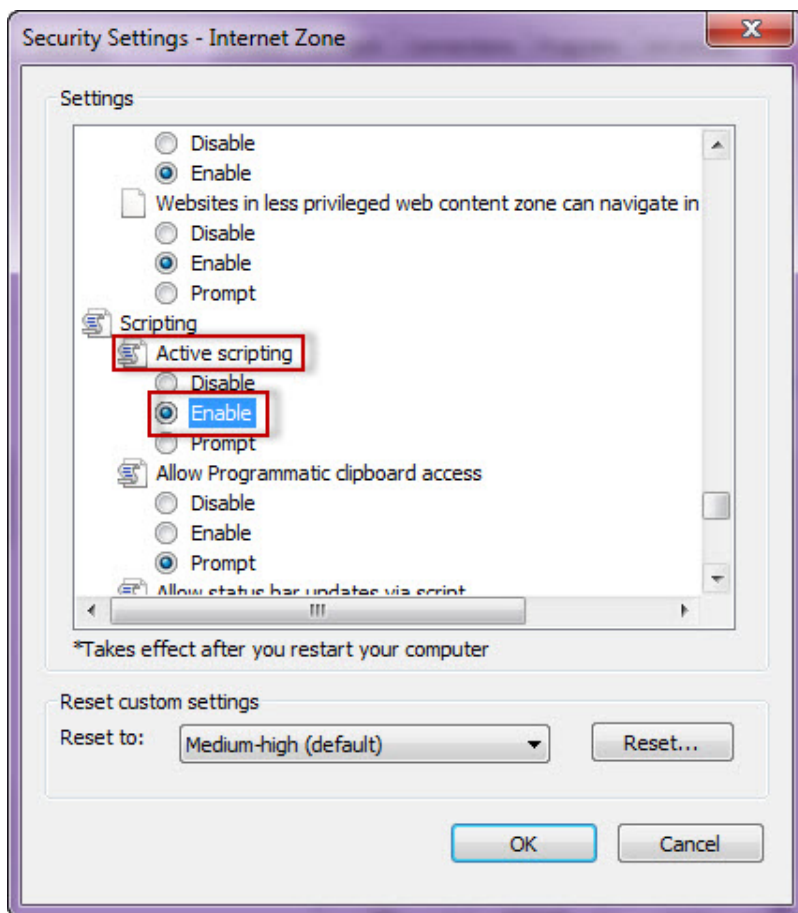

Internet Explorer 9,10,11

To configure these versions of **Internet Explorer** , follow these steps:

1. Go to **Internet Options**
2. Click **Security**
3. Click **Internet** and then **Custom Level**
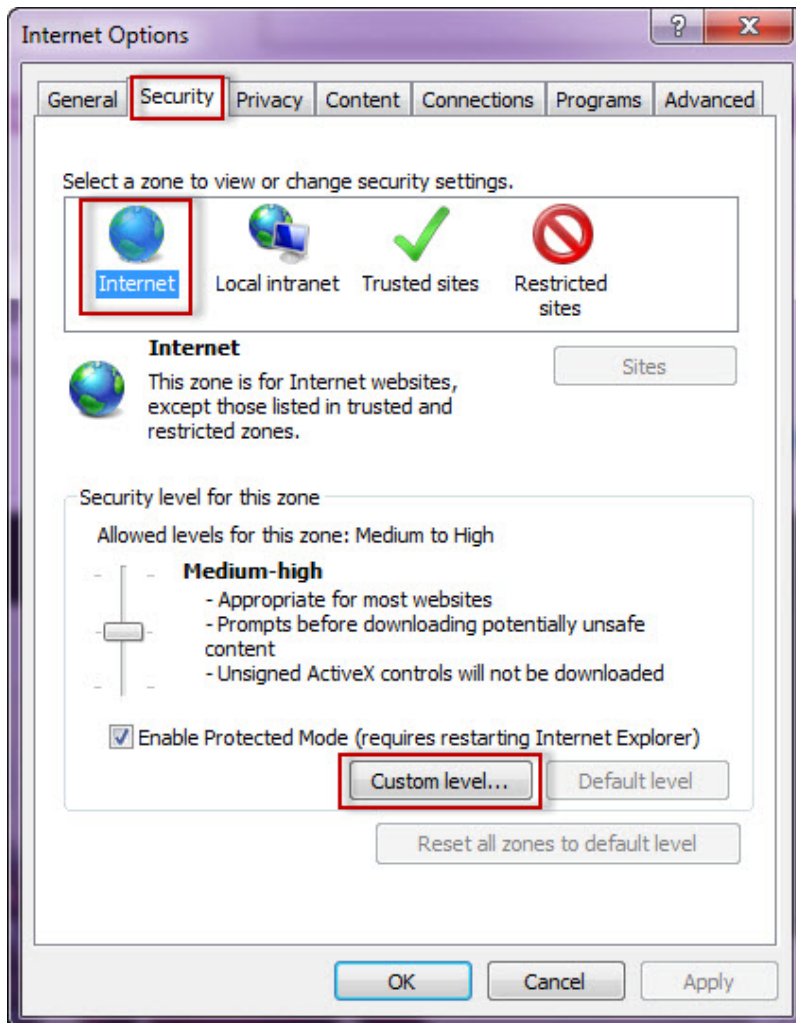

4. Go to Scripting/Active scripting and make sure **Enable** is selected.

5. Then go to User Authentication/Logon and make sure **Automatic logon with current user name and password** is selected.

6. Click **OK.**

Security Settings - Internet Zone
