Viewing the steps of your job

The **Job History** tab allows you to drill into any job event and see more specific information about its steps. Click the + button to expand and view the following information of each job event:

- **Status** - displays the status of each step.
- **Date time** - shows the date, time, and timezone when the step finished.
- **Step ID** - displays the identification number (ID) of each step.
- **Step Name** - displays the name of the step.
- **Message** - shows additional information of the step.

For more information on how to order and filter the information on the **Job History** tab, go to Organizing and filtering your job history information.

SQL Enterprise Job Manager monitors and manages your SQL Server agent jobs. Learn more > >
